e2v Adopts EdXact's Jivaro Tools

GRENOBLE, France --(Business Wire)-- EdXact SA today announced that its Jivaro netlist reduction tool was chosen by e2v, a leading developer and manufacturer of specialised components and subsystems.

Click here to learn how to leverage greater long-term value from your CRM system.

Workforce Optimization + Actionable Intelligence graphic

EdXact (Voiron, France) provides software solutions that help to accelerate the overall backend IC physical verification cycle.

Jivaro was chosen to help accelerate postlayout verifications on the A/D converters design, which is a strategic project at e2v.

On that A/D mixed signal design, Jivaro-enabled simulations proved to execute 3 to 10 times faster, with the same level of accuracy, thus allowing more verifications to be executed and larger blocks to be verified.

Vendor Guru has done the research to help you quickly find respected, cutting-edge CRM companies with the products and services that are right for your business.

"Thanks to Jivaro, we were able to meet our just in time constraints, and to increase our verification targets as well" stated D. Boisgontier, manager of e2v's Broadband Data Converter development team.

"We are pleased to help e2v to deliver innovative products and achieve quick time to market," said Mathias Silvant, EdXact President.

Video: Google Dials Into the Cell Phone Market

Confirming its long-rumored foray into the mobile market, Google said Monday it is developing a free cell phone software package so the Internet search leader can more easily peddle ads and services to people who aren't in front of a PC. (Nov. 5)

Video: Telecoms ring up profits in India's telecom boom

India may be known for its poverty, but the South Asian nation is also emerging as the world's fastest growing mobile phone market, thanks to a bumper economy and a 1.1 billion strong population. Phone companies are vying to secure a piece of this lucrative business, but they admit their customers are not who they expected.

Video: The Hottest Car Convention of the Year Goes Green

Each year thousands of automotive customizers and tuners, as well as media and celebrities attend the Specialty Equipment and Marketers Association Convention (SEMA) in Las Vegas. The 37 billion dollar a year industry unveils the hottest and latest technology and equipment to help pimp their rides. But this year it's not all about bigger and faster: Always on top of the latest trends, the convention is going green. Tuners in the market have begun researching E85, because it has a lot of octane capability. Ethanol is giving the green light to those who love to go fast. By buying E85 you are buying 100 octane racing fuel, which is also a biofuel. So you get the best of both worlds. Celebrities are also choosing to be environmentally efficient. Jay Leno, a self-confessed "car nut," is showing off his latest Corvette, modified to run on the bio-fuel, E85 ethanol, made from corn. Produced for General Motors
